

WOOD WAX FINISH INTENSIVE

OSMO Wood Wax Finish is a satin, transparent or intensive wood finish which combines all the advantages of oils and waxes in one unique product. Resistant to water, dirt and stains.

Easy application—no primer is required, and sanding between coats is not necessary in most cases, which saves time and money. The dry finish is safe for humans, plants and animals.

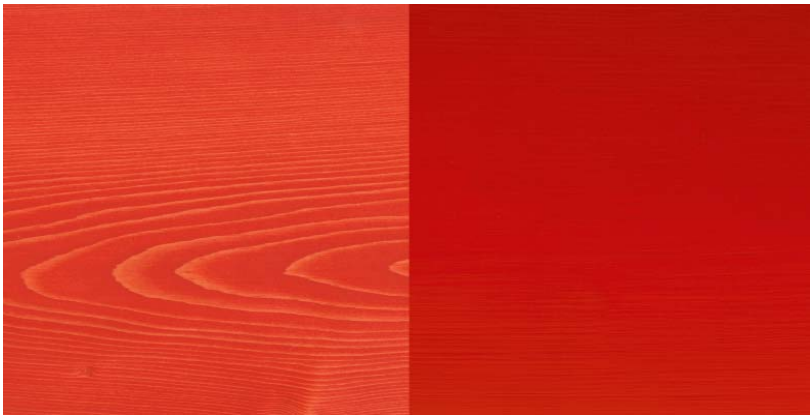

Wood Wax Finish

Wood Wax Finish Transparent and Creativ have merged ranges into one product with a large selection of colours—both transparent and intensive.

Intensive Colours

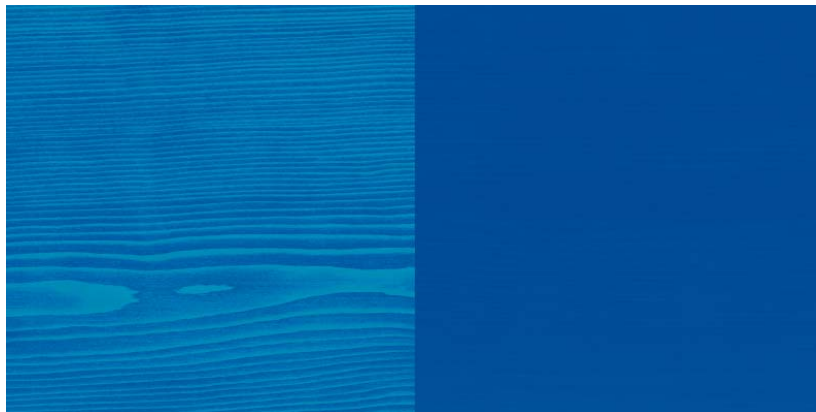

Opaque colours after two coats. (not suitable for flooring)

3104 Red (new)

3105 Yellow (new)

3125 Blue (new)

3131 (green)

3132 Grey Beige (new)

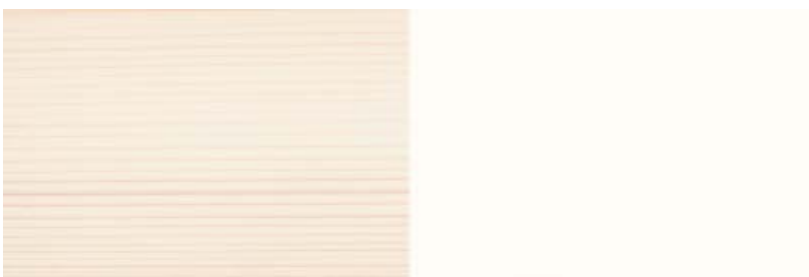

3169 Black

3172 Silk

3181 Pebble

3188 Snow

The colours above are a true likeness of the original, after application onto Spruce. However, some variation may occur due to screen brightness, the uploading process and if these pages are printed.

It is recommended to test the colours you require on a small sample of your timber, as colours may appear differently on other wood species.
